

Carefully shake the Sample Collection Tube.

Unscrew and remove the white cap. This reveals a dropper. Drop 3 drops onto the Sample well of the Hb or Hb/Hp test strip in the cassette. The sample is absorbed in 5 to 15 minutes. Results can be read after 15 to 25 minutes.

Product specifications

- Sample: gastric biopsy specimen
- Test principle: H. pylori urease activity
- Kit components: test tube/plate and reagent, instruction for use
- Storage: +2-25°C
- Quality control: positive control available

In the USA and Japan for research use only.

Reference:
The Biohit *H. pylori* UFT300 is a true quick test for the detection of *H. pylori* from a biopsy. The biopsy taken during gastroscopy can be tested immediately to diagnose *H. pylori* infection or to check the success of eradication therapy. The result is ready in only 5 minutes enabling diagnosis and reporting during the same visit to the doctor. The UFT300 quick test has excellent sensitivity and specificity which makes it a highly reliable tool for diagnostics.

- Ready-to-use test kit
- Results ready in 5 min
- Storage in room temperature
- Sensitivity 94.5%, Specificity 100%\(^1\)
- Testing and reporting during one appointment

**Ultra-fast *H. pylori* detection from a biopsy**

**Simple test procedure with plate**

1. Place 1 or more biopsies into the well of the plate

2. Add one drop of the reagent solution. If the biopsy is not covered, add another drop. Cover the plate with label and shake for 5 seconds

3. Read after 5 minutes

**Simple test procedure with tube**

1. Place 1 or more biopsies into the tube

2. Add one drop of the reagent solution. If the biopsy is not covered, add another drop. Cap the tube and shake for 5 seconds

3. Read after 5 minutes

**Biopsy testing could not be easier**

The Biohit *H. pylori* UFT300 quick test is easy and effortless to use. The biopsy specimen is placed into the test tube/well of the plate and mixed with the test reagent. Color change indicates the presence of *H. pylori* in the specimen. The procedure is safe and hygienic for the user, and the interpretation of the result doesn’t require specialist training.
