

GastroPanel®

stomach health test

Test before referral!

Innovative test for primary care to improve productivity

GastroPanel® is a cost-effective tool for general practitioners for the management of dyspeptic patients. The patient-friendly blood test is especially useful for dyspeptic patients of over 40 years of age.

- Accurately identify patients requiring referral for gastroscopy
- Get reliable information on the status and function of stomach mucosa including *H. pylori*
- Reduce unnecessary referrals to gastroscopy and improve productivity
- Identify risk patients for gastric cancer
