## MAIN CHARACTERISTICS OF THE INTERNAL CONTROL OF THE FINANCIAL REPORTING PROCESS AND RISK MANAGEMENT

Biohit's internal control is responsible for ensuring that the Group carries out its business operations within the framework of current regulations and legislation, and in accordance with the Board of Directors' instructions. Internal control seeks to ensure that the Group operates with maximum efficiency and that the objectives set in the strategy ratified by the Board of Directors are achieved at different levels of the organisation. Risk management is geared towards supporting the achievement of these objectives by anticipating and managing business-related risks.

## Control environment

Biohit's business operations and administration aim to realise the company's values, of which the most important is to promote health and wellbeing through innovation. Biohit will now focus on its diagnostics business, in which the company conducts global operations in both manufacturing and sales and marketing.

Biohit's control environment is defined by the Board of Directors, which, as the highest administrative body, is responsible for organising internal control. The President & CEO is responsible for maintaining the efficiency of the control environment and the functionality of internal control. Biohit's financial department is responsible for the functionality of financial reporting as well as the interpretation and application of financial statement standards in line with the separately ratified instructions.

## Risk assessment

In the assessment of risks related to financial reporting, Biohit's objective is to identify the major risks associated with the Group's business operations and environment. The cost-effective management and monitoring of these risks will then ensure that the company's strategic and operational targets can be reached as intended.

The Board of Directors carries the main responsibility for risk assessment and monitoring the implementation of risk management. The President & CEO works with the parent company's operative management and subsidiaries' managements to ensure that the Group's risk management is duly arranged. The parent company's operative management is responsible for identifying and managing the risks involved within each business area, while subsidiaries' managements are responsible for those in their own market areas.

Risk management is one of the areas covered by Biohit's internal control processes, which regularly monitor the risks associated with the company's business operations, identify any changes and, if necessary, take appropriate action to hedge against them. Risk management focuses on ensuring the continuity of business operations and preventing financial misconduct.

## Control measures

Internal control measures are integrated into the Group's general business management and reporting process. Subsidiaries report on business and earnings trends and the most significant deviations, to Group Management on a monthly and quarterly basis. The Group's Management Team reports to the BOD on the overall development of business; these two bodies, together with the President and CEO, decide on overall corporate strategies and procedures guiding the operations of the Group.

Subsidiaries' Boards follow business developments and ensure that the parent company's approved instructions and guidelines are followed. As a rule, each subsidiary's Board of Directors convenes after the end of each quarter. Subsidiary Boards work with financial reports and the written quarterly reports drawn up by subsidiary management.

Biohit's steering and control is carried out in accordance with the management system described above. The company provides the reporting systems necessary for business and financial management.

The financial department of the parent company provides instructions for drawing up annual and interim financial statements and prepares the consolidated financial statements. The parent company's financial department retains central control of funding and administrative matters within the framework of the instructions provided by the Board of Directors and the President & CEO, and is also responsible for the management of interest and exchange rate risks. The Managing Directors of subsidiaries ensure that subsidiaries' reporting is carried out in accordance with the instructions given by the Group's Management Team. The parent company's administration department controls and provides instructions on Group-level personnel policies and any agreements made within the Group.

## Disclosure policy

Biohit aims to provide all of its stakeholders with information about the company's operations in a proactive, consistent and timely manner. The company seeks to take the special requirements and interests of all its stakeholders into account in its communications, in order to increase confidence in the company and thereby promote its business operations. Biohit's Board of Directors has ratified an information release policy with a view to ensuring the accuracy and reliability of any information released. The policy also specifies who is responsible for communications in different situations.

Biohit's financial department regularly provides information on processes related to financial administration reporting. This ensures the real-time availability of data, which is a prerequisite for efficient internal control. Financial administration guidelines and the company's information release policy aim to ensure the promptness and comprehensiveness of communications and the release of information required for internal control purposes.

## Monitoring

The efficiency of internal controls on financial reporting is overseen by the Board of Directors, the President & CEO, Management Team members, and the Managing Directors of subsidiaries. Control focuses on following weekly and monthly financial reports and forecasts, and analysing any deviations

from business plans. Monitoring is performed at all Board and Management Team meetings where reports are reviewed. It is supported by regular contact between Group Management and the company's auditor, and the analysis of any deviations, which occurs at least once a quarter. The audit frameworks for the Group's subsidiaries and key audit areas are jointly defined by the Group's financial management and the chief auditor.

Biohit has not appointed a separately organised function for internal auditing purposes. The Group's financial management holds primary responsibility for the practical implementation of the internal audit.

The Group has all the internal control reporting systems required for financial management and monitoring business development. The reporting systems produce monthly financial data, so that financial management can ensure that the parent company's approved instructions on, for example, authorisations are being adhered to. The Group's auditor and the auditors of each subsidiary evaluate the effectiveness of the internal control system both in connection with the external audit and through spot checks throughout the financial year.

## AUDIT 2012

The auditor elected by the AGM is responsible for Biohit's statutory audit. According to the Articles of Association, the company needs to have one auditing body approved by the Central Chamber of Commerce.

Biohit's auditor in 2012 was authorised public accountants Ernst & Young Oy, with Erkka Talvinko, Authorised Public Accountant, as chief auditor.

## Auditors' fees

The Group's invoiced auditors' fees for the financial year 2012 totalled EUR 46,000 (EUR 149,000 in 2011). Authorised public accountants Ernst & Young Oy were also paid a total of EUR 28,000 (EUR 50,000 in 2011) for other services.
